

Bill Murphey has a B.S. in Applied Physics, and an M.S. and PhD in Earth and Atmospheric Sciences from the Georgia Institute of Technology. He worked for 8 years as a meteorologist for the Atmospheric Sciences Research Center at the State University of New York at Albany studying synoptic and meso-synoptic scale systems in the Polar Regions and in the Adirondack Mountains. Bill is currently Chief Meteorologist for the Environmental Protection Division of the Georgia Department of Natural Resources and is involved with daily PM2.5 and ozone forecasting for protection of public health, and emergency response. While at Georgia DNR, he has been closely involved with installing, operating, and maintaining surface and upper air meteorological monitoring stations across the state. He serves on the NOAA Air Quality Model focus group and the GOES-R air quality proving ground advisory group. Bill is also an adjunct college professor teaching Environmental Sciences at Georgia Perimeter College.
